DO NOT REMOVE THE FOAM PADDING FROM THE METAL FRAME. THIS IS INTENTIONAL, IS A VITAL PART OF THE BASSINETS FRAME AND IS NOT PACKING MATERIAL.

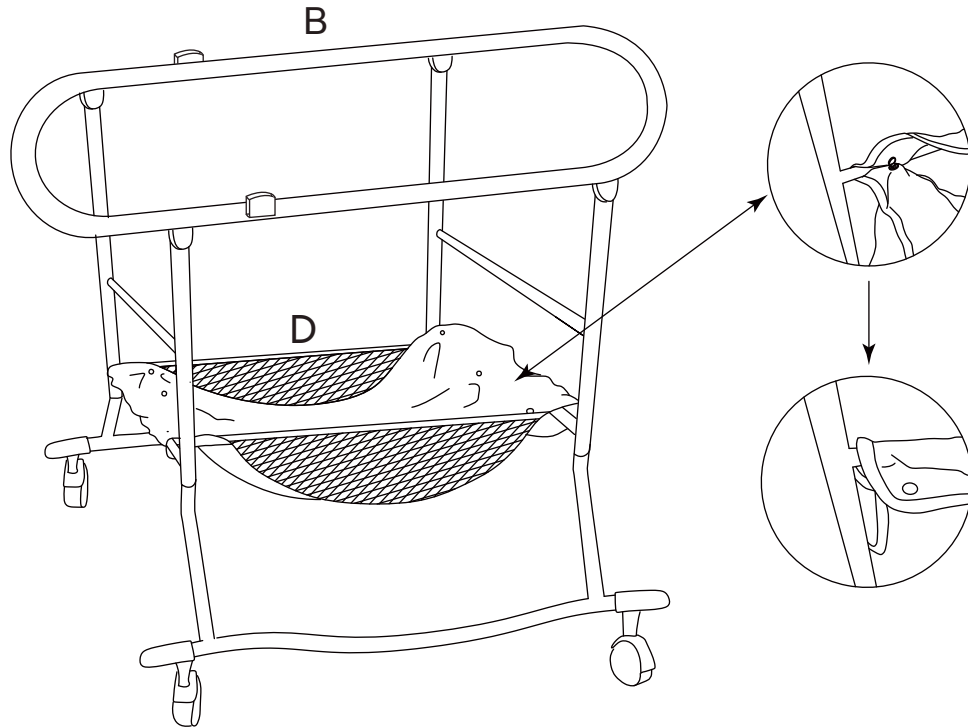

1

Unfold the BODY (B) and attach both of the LEGS (A). The wheels rotate and can be locked in the cradle position (the bassinet will rock) or in the bassinet position (the bassinet is stationary). Rotate the wheels by gently pulling the wheel assembly out towards the end of the leg post, rotate the wheel to the up or down position as desired, and then let the wheel snap back into place on the leg post. **!! WARNING:** After adjusting each wheel, you **MUST** make sure all the wheels are held in position by the locking posts.

2

Turn the BODY(B) right side up. Secure the BASKET (D) to the BODY (B).

3

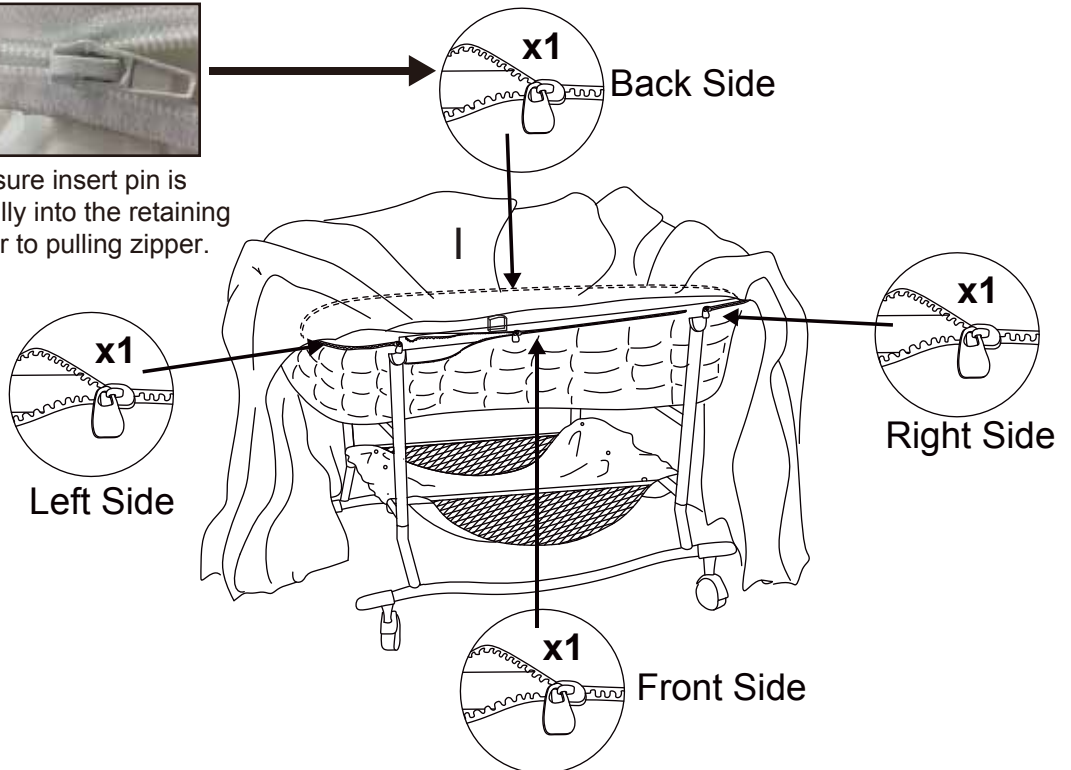

Unfold the LINER/SKIRT (I) and position it on the frame. Then zip all of the zippers around the top rim of the bassinet on all sides around the BODY (B).

READ AND FOLLOW ALL DIRECTIONS IN THE ASSEMBLY MANUAL! BE SURE THAT ALL OF THE ZIPPERS ON THE BEDDING, THAT GO AROUND THE BASSINET FRAME, ARE ZIPPED TO KEEP THE LINER SECURE!

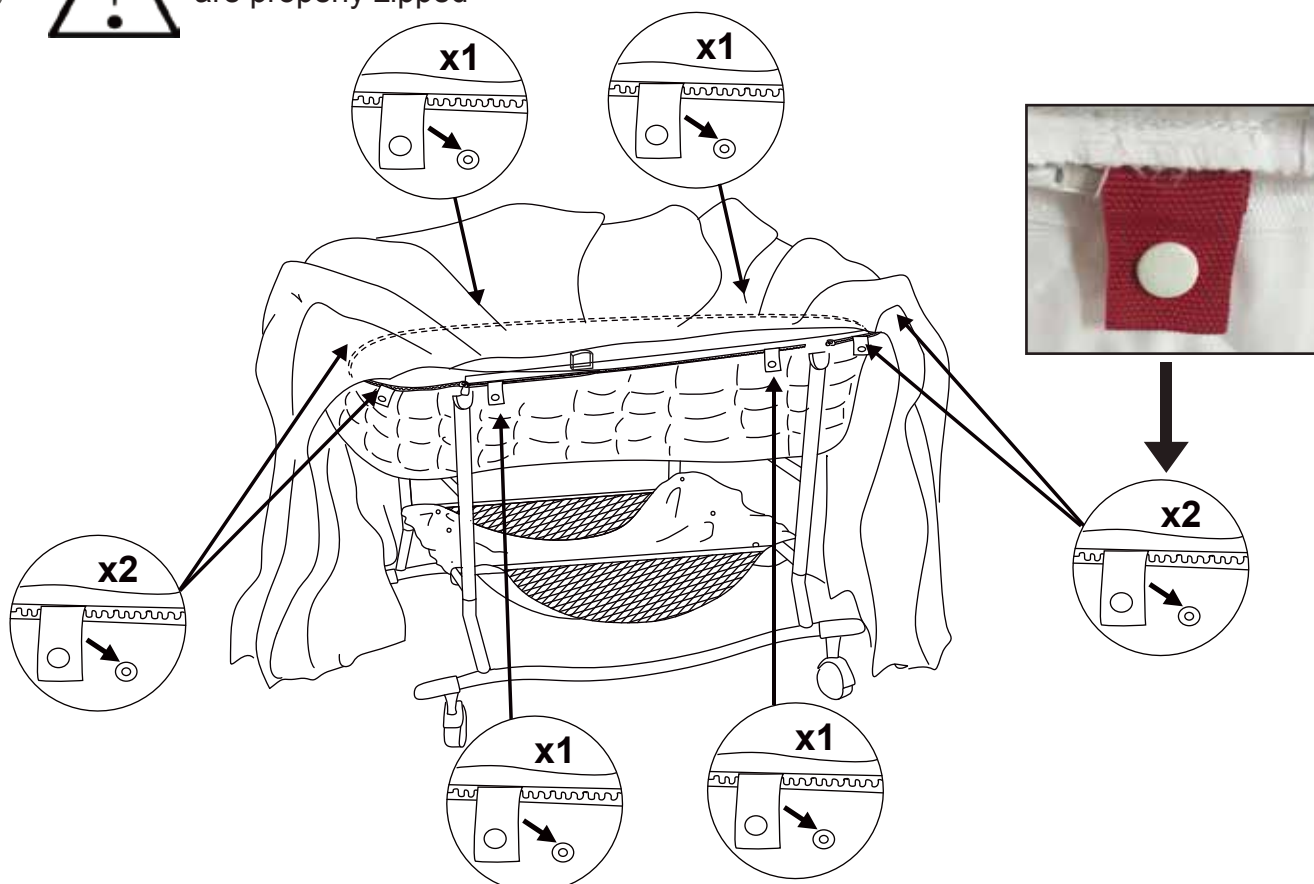

Make sure insert pin is inserted fully into the retaining box prior to pulling zipper.

4

“WARNING: Make sure that ALL 8 red safety snaps are secured after the zippers are properly zipped”

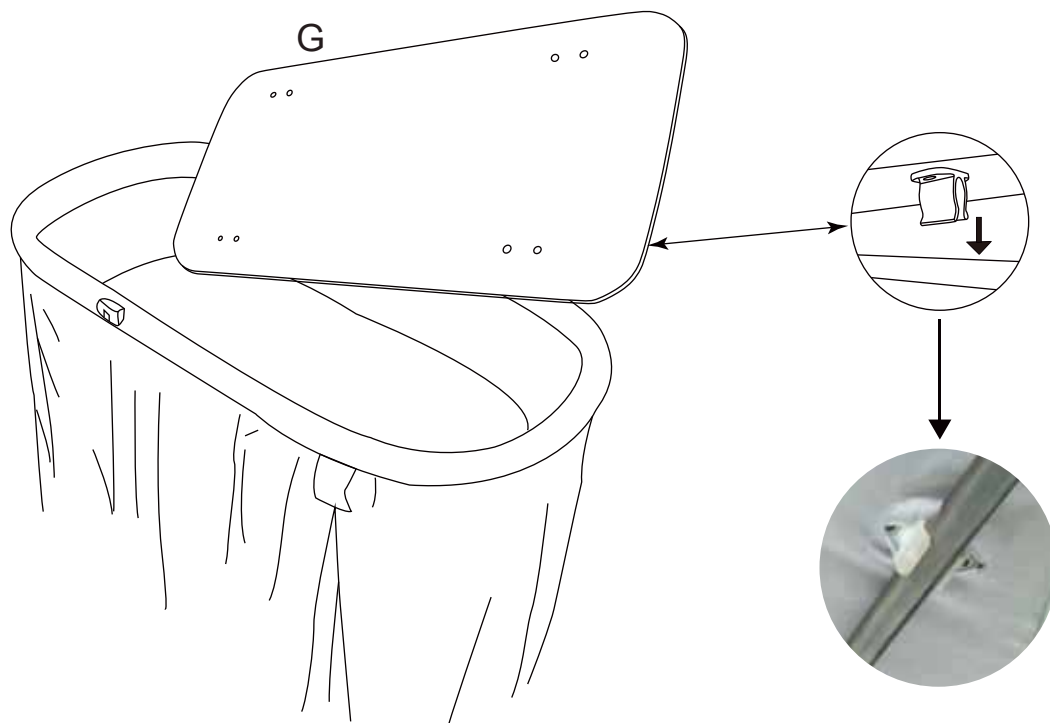

5

Insert the BOTTOM (G). Push the clips through the holes in the fabric. Position the clips on the outside. Then apply pressure to BOTH SIDES of the BOTTOM (G) on the inside at the same time to snap the clips into place.

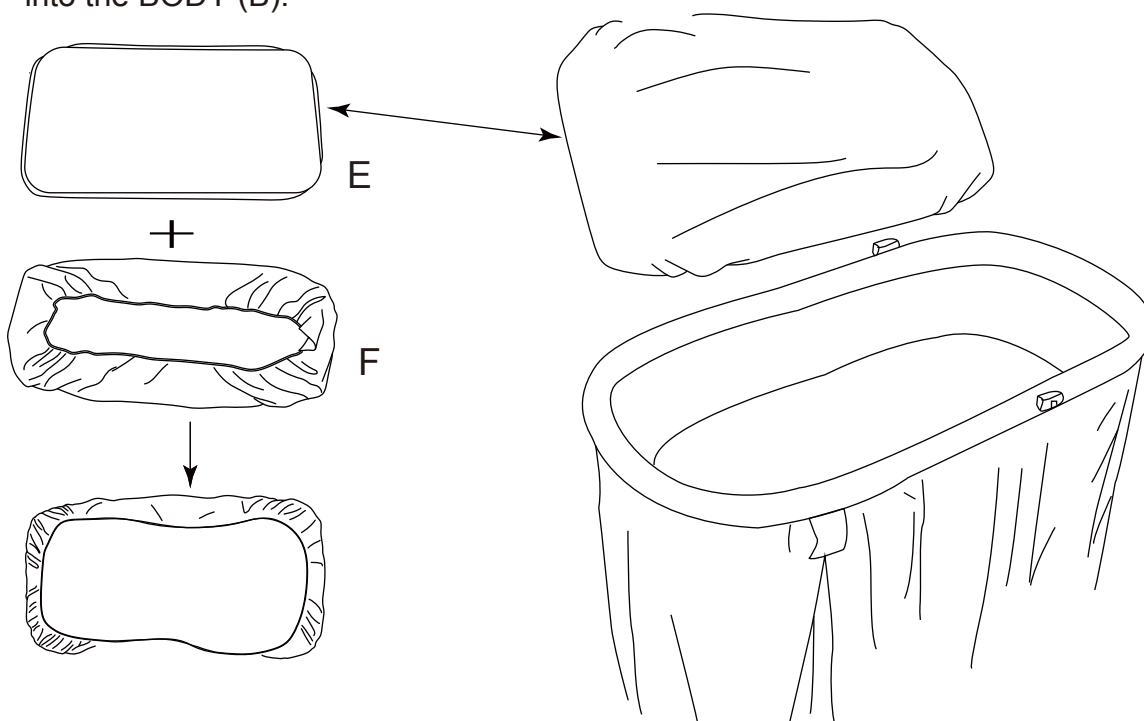

It is helpful to have assistance with this step so one person can position the clips on the outside and then the second person can apply pressure to both sides on the inside.

6

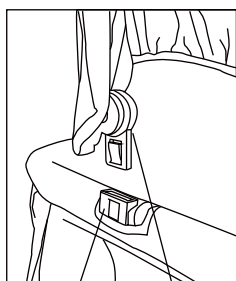

Put the FITTED SHEET (F) onto the VINYL/FOAM PAD (E) and insert into the BODY (B).

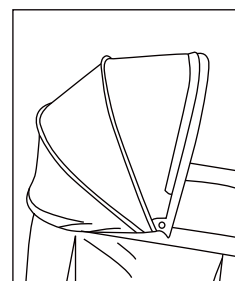

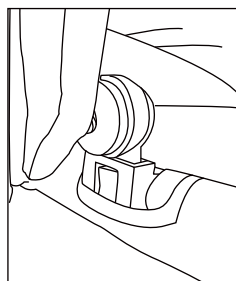

7

Fully insert the CANOPY (C) posts into the clips on the BODY (B).

IF APPLICABLE TO YOUR MODEL: Thread the BELT (H) through the belt loops on the LINER/SKIRT (I) and tie the ends into a bow.
